

In re Application of AMIT, et al.
Serial No. 09/733,522

AMENDMENTS TO CLAIMS

Please amend the claims as follows (*wherein additions are shown by underlining and deletions are shown by strikethrough in amended claims*):

1. (currently amended): A system for notifying clients of job-related events of an event source, comprising:

a first trigger engine configured to register event requests, including a first event request from a first client and a second event request from a second client, and to concentrate the first and second event requests into a base event request;

a second trigger engine configured to communicate with the first trigger engine to receive a registration of the base event request at the second trigger engine, and further configured to receive notification of an event of the event source corresponding to the base event; and

upon receipt of an event instance corresponding to the base event from the event source, the second trigger engine communicating data indicative of the event instance to the first trigger engine, the first trigger engine configured to determine which of the one or more event requests whether the event instance corresponds to,

wherein if the event instance corresponds to the first event request, and if so, then the first trigger engine to notify notifies the first client of the event instance, and

wherein if the event instance corresponds to the second event request, then the first trigger engine configured to determine whether the event instance corresponds to the second event request, and if so, to notify notifies the second client of the event instance.

Not Approved
for Entry.
